AND ALL FOR \$8 A YEAR!

Surely No One in Budapest Ever Kicks About the 'Phone Service.

For several years Budapest, Hungary has rejoiced in the "news telephone" and now new extensions and improvements have been made to this tremendously popular system.

It seems that in that city by the payment of \$8 as a yearly rate a citizen is entitled to receive all the news of the day by telephone. The program starts in the morning and lasts until evening, in the course of which time you are made acquainted with all the latest happenings of both local and foreign interest.

At 9 in the morning the daily service begins. A buzzer announces the correct time so loud that you can hear it in the next room. One hour and a half later the program of all the day's events is given. You are not likely to miss anything exciting that is going on because you haven't heard about it or because you have forgotten it for the time being. At noon you are informed of all the parliamentary news and anything of unexpected local or foreign importance. An hour later quotations are given from different exchanges, foreign as well as local. Two o'clock brings more topics of general interest. Three o'clock you receive the weather forecast and all personal items of social interest. Again at 4 you are given the court news, and then from 4:30 to 6 you can listen to music in the different amusement gardens.
