## **The Commercial Port of Budapest.**

Desiring to come to an agreement with a group of French financiers, among them MM. Schneider & Co., for the purpose of a development of the Budapest harbour by the construction of suitable basins, the Hungarian Government, says the Bulletin of the Fiume Institute for the Development of International Trade, contemplates granting a 50 years' concession to a proposed joint-stock company, which would undertake the administration and upkeep of the harbour. The costs of construction, which have been estimated at 2,000 million Hungarian crowns, would be advanced to the company by the Hungarian Government, while 14 million French francs would be raised, principally in France, for the further expenses and business enterprises of the concern. On the basis of a provisional agreement with the authorities, the French financiers have had the site surveyed and have practically commenced operations.

As soon as the company has been formed, it is expected that the scheme will advance quickly and it is hoped that early in the new year will see about one quarter of the work on the basins completed and several warehouses erected.

## **Export of Hungarian Horses.**

The Hungarian Ministry of Finance has fixed the following export premiums to be paid on all horses exported from that country: For thorough-bred race-horses, 80,000 Hungarian crowns each; for second-rate race-horses, 40,000 crowns; for third-rate ditto, 25,000. For all other horses the premium amounts to 50% of the value, which, in the case of horses passing through the Budapest market, is estimated according to the tax paid on the animal, the value of provincial horses being appraised by the Ministry of Agriculture in each individual case. Mares liable to foal receive exceptional treatment, the premium exacted in such cases amounting to 80% ad valorem.
